

SWADESHI AI

Swadeshi AI Private Limited

Pioneering Accessible and Agentic AI Solutions
CIN: U62099TS2026PTC212584

SWADESHI AI PRIVATE LIMITED

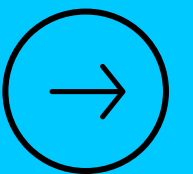

Company Overview

Swadeshi AI Private Limited is an AI research and development company inspired by industry leaders like OpenAI and DeepMind. Our vision is to democratize AI tools and create agentic AI systems that solve real-world problems. Our mission is to build innovative AI platforms and applications accessible to individuals and businesses alike.

Our Journey So Far

Find My File: Our first Android app that enables users to locate lost files using simple natural language prompts. This project demonstrated our capability in building practical, AI-powered consumer applications.

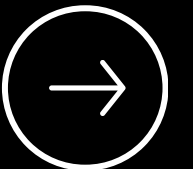

Current Focus: Text2LLM IDE

Text2LLM IDE is a virtual AI lab enabling users to build, experiment, and deploy LLM tools easily.

- Prompt editor for intuitive development
- Seamless model integration
- Experiment dashboard for tracking
- Development progress: 50% complete
- Planned launch: April 2025

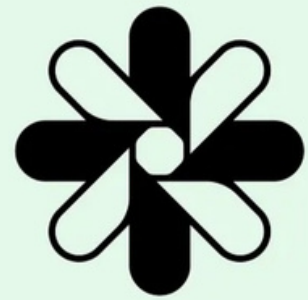

Goal: Empower non-experts to create AI-powered applications.

Current Focus: AI Trading System

Our agentic AI trading system targets Polymarket prediction markets and cryptocurrency exchanges. Paper trading phase successfully completed, with real trading commencing this week. Q1 Target: \$1000 profit milestone.

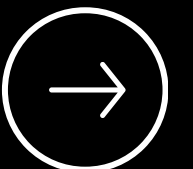

Market Opportunity for AI Trading

Growing crypto and prediction market volumes create unprecedented demand for AI-driven trading strategies, offering scalable opportunities for consistent profits.

Future Vision: AI-Driven Hedge Fund

If AI trading proves successful, we will launch a hedge fund where agentic AI trades customer capital. Our profit-sharing model ensures customers receive returns while the company takes a percentage to reinvest in R&D and expand our AI product portfolio.

SWADESHI AI PRIVATE LIMITED

Business Model and Growth Strategy

Revenue Streams: AI trading profits, hedge fund profit share, and Text2LLM IDE licensing. Growth Strategy: Reinvest profits into new AI projects, expand user base and product ecosystem, build strategic partnerships, and secure funding.

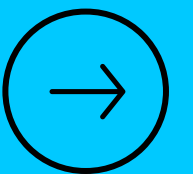

Roadmap and Milestones

- April: Launch Text2LLM IDE public version
- This Week: Commence real AI trading operations
- Q1: Achieve \$1000 profit target from AI trading
- Mid-Year: Launch hedge fund if trading proves successful
- Ongoing: Develop new AI projects funded by hedge fund profits

Why Swadeshi AI?

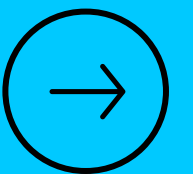

Experienced AI team with proven track record. Unique combination of accessible AI tools and agentic AI trading. Early mover in AI-driven hedge funds with profit-sharing. Commitment to reinvesting profits into innovative AI research.

SWADESHI AI
